

Co-primary comparisons: paired patient-bootstrap CI on AUROC difference
Decision rule: CI must exclude 0 (entirely positive) AND be Holm-significant. Both REJECTED.

A: Geneformer – Metadata

REJECTED diff=+0.2375, CI=[-0.0431, +0.5179], p=0.08691 (pre-Holm)

B: Geneformer – Pseudobulk

REJECTED diff=-0.0828, CI=[-0.2061, +0.0242], p=0.18382 (pre-Holm)
