

Sealed-cohort AUROC, stratified by age group

Error bars: 95% patient-bootstrap CI. Adult stratum is small (n=12); CIs are wide.

Source: results/l2_sealed_results.json, 'stratified' fields per arm. Age-group stratification pre-declared in PREREG.md Section 7 (amendment 2026-07-19). Adult stratum n=12 (7 SLE/5 healthy) -- interpret CIs with that small n in mind.
