

Co-primary comparisons: paired patient-bootstrap CI on AUROC difference
Decision rule: CI must exclude 0 (entirely positive) AND be Holm-significant. Both REJECTED.

AUROC difference (Geneformer - comparator), sealed cohort

Source: results/l2_sealed_results.json, 'co_primary_comparisons'. Decision rule and Holm step-down per PREREG.md Sections 5-6, alpha=0.05. REJECTED = null not rejected (CI includes 0 and/or not Holm-significant) -- not evidence of a negative effect, only failure to reach the pre-specified confirmatory bar.
