

Dev-cohort internal CV vs. sealed-cohort AUROC, all three arms
Error bars: 95% patient-bootstrap CI

Source: results/I2_dev_sle_vs_healthy.csv (dev), results/I2_sealed_results.json (sealed). PREREG.md/FREEZE.json binding. Sealed cohort opened once (GSE135779, n=56); dev is internal cross-validation, not an independent test.
