

Geneformer: sealed-cohort permutation-null distribution
Two-sided permutation $p = 0.00100$ (null mean=0.5067, std=0.0865)

Source: results/l2_sealed_predictions_regenerated.json (permutation_null array, seed=20260721, matches results/l2_sealed_results.json's summary stats exactly). Null: sealed labels shuffled against fixed, frozen-model predictions -- no refitting.
